

Supply of urban land**Objective**

To ensure a sufficient supply of land is available for residential, commercial, retail, industrial, recreational, institutional and other community uses.

Strategies

Ensure the ongoing provision of land and supporting infrastructure to support sustainable urban development.

Ensure that sufficient land is available to meet forecast demand.

Plan to accommodate projected population growth over at least a 15 year period and provide clear direction on locations where growth should occur. Residential land supply will be considered on a municipal basis, rather than a town-by-town basis.

Planning for urban growth should consider:

- Opportunities for the consolidation, redevelopment and intensification of existing urban areas.
- Neighbourhood character and landscape considerations.
- The limits of land capability and natural hazards and environmental quality.
- Service limitations and the costs of providing infrastructure.

Monitor development trends and land supply and demand for housing and industry.

Maintain access to productive natural resources and an adequate supply of well-located land for energy generation, infrastructure and industry.

Restrict rural residential development that would compromise future development at higher densities.

Policy guidelines

Consider as relevant:

- Victorian Government population projections and land supply estimates.
